Archeocelentography
Archeoplanetography:

A complex, multi-faceted, illustrated historic information system embedded within the landscape of the planet, portraying the dominant species influencing that area.

Image Landsat
Data SIO, NOAA, U.S. Navy, NGA, GEBCO
Image IBCAO
We have been asked to provide more outlined and unoutlined archeoplanetography images so that learning can be facilitated.
These outlined and un-outlined images have been taken directly from Google Earth, Google Moon and Google Mars.

The screen shots were not altered or tampered in any way.
Many of these contain the latitude and longitude information in tiny white print at the bottom of the screen shot.
Currently they are in no particular order.
“Babe” (so nicknamed after the fictional Babe the Blue Ox of Paul Bunyan fame.)

This was the first archeoplanetography image shown to our telepath in late November of 2014.
“Babe”

Manzano Mountains, Albuquerque, NM

34°56'15.50"N 106°15'44.57"W
North = 6:00
Size: 6 x 6 miles (8 x 8 km)
Vietnam’s Elephant

Location: 14 40°55.40”N 105 28°24.02”E

Eye alt 1208.93 miles   North = 9:00

Size: 777 miles (1250 km) nose to ear
Albuquerque, NM

Find the eye at:
35° 6'55.30"N 106°13'59.45"W
North = 12:00
Length = 12 miles/19 km
Northwestern Pacific Ocean

Find the thumbnail at:
8°37'29.52"N 135°47'12.74"E

North = 8:00
Back of the hand width:
900 mi/1445 km.
Length (thumb tip to cuff):
600 mi/2600 km.
Saudi Arabia’s 6 fingered hand

Saudi Arabia’s 6 Fingered hand
Width 260 mi/420 km
Length 800+ mi/1400+km
Northern Asia

67°38'52.46"N 102°14'11.73"E

Width 1375 miles/2220 km

North = 3:00
Southern Pacific
Mid Atlantic Ocean

South America is at 10:00, North America 2:00, Africa 7:00, Europe 5:00. Greenland is the white bowl being offered.
Mid Atlantic

Notice what appears to be a second profile standing to the right of the outlined figure.

Africa is to the left at 9:00. South America is at 2:00. Greenland is the white island at 5:00.
Eyeing Central America

South America makes up the forehead. The lips are created by the Cayman Trough in the Caribbean.
Indonesia

Length 615 miles/990 km
North is at 9:00.

Many of you archeoplanetography students will find that you can go back and begin to see other things you missed the first time.
Go ahead and try it.
